

and watching the girls perform their skits and their Power Points each year really caught my attention. Being a part of the Techsploration team would be a great way to learn about different careers and helping me choose a career path. I also have experience in leadership roles and volunteer hours. I find that Techsploration is overall a great learning experience.

As my senior years are approaching, it is time for me to look into career paths that I might find interesting. The Techsploration program is a great opportunity for me to learn about all of these jobs that I may have an interest in like engineering, mechanics or computer technology as well as careers that I may not be aware of. Personally, I think that every girl should have the chance to be a part of this program and become aware of these career paths so they have some options for the future.

Leadership, working together as a team and getting along is a big part of Techsploration. I have strong leadership skills. I like to make sure that everyone gets involved and that nobody is left out, but I also make sure everything is organized so everyone is aware of their responsibility and task and I also try to help others as much as possible. I was captain of my club volleyball and basketball team. I am currently captain of my school basketball team. I also organized a bake sale last year for our grade eight school trip to Keji in order to help raise the remaining funds.

I volunteer and help others as much as possible. I am in my school's We Act committee, organizing campaigns like "We Are Silent", and "Kiss AIDS Goodbye" to spread awareness. I also participate in the bake sales and hat days to raise money to go to second world countries, which helps with buying goats and other things for them. "We Scare Hunger", and later this month a clothing drive and the "Teens for Jeans" campaign are a few out of several events I will be participating in. I also plan on knitting hats and baby blankets for the IWK. I volunteered my spare hours at the haunted corn maze this fall as well.

Lastly, Techsploration involves both public speaking and teamwork. I am very good at cooperating in a group but would like to enhance my public speaking skills and I think Techsploration would be a great way to improve my skills. Writing and performing our skit in front of our sister school will also be a great way to enhance those skills. Not only will this be a learning experience but it will also get us to work as a team.

I want to participate in Techsploration in order able to meet and have a mentor, learn about different career paths, and be able to bond as a team. This will be an excellent learning experience and will definitely bring girls' friendships closer together. My leadership skills, volunteer work and passion for this group are reasons why I should be on this year's Techsploration team.
